Sargent and Greenleaf intros biometric safe-deposit solution

• 14 Nov 2006

SAN DIEGO — Sargent and Greenleaf, a subsidiary of Stanley Security Solutions Inc., has introduced its biometric TouchVault solution, a secure, self-service safe deposit access system for financial institutions.

The TouchVault system is a fully automated safe deposit banking solution that employs biometric fingerprint technology to authenticate customers and control day-gate access. As a result, the solution eliminates the need for traditional safe deposit keys, allowing unescorted box access and, subsequently, lowering costs by improving efficiency and staff productivity.
