

# ACCESS CONTROL & SECURITY SYSTEMS

securitysolutions.com

USING TECHNOLOGY TO PROTECT PEOPLE, FACILITIES AND ASSETS

DECEMBER 2005

## 32 REFERENCE

### DOOR SYSTEM

FOR HOSPITAL FACILITIES

The system combines a manual swing and two-panel bi-fold door into a single unit design with one continuous header. The design connects the two diverse door types and eliminates the need to cut a crease in two headers to make a bi-fold and manual door into one door. Measuring 1.75 inches x 4.5 inches, the thickness is thin and narrow. *7600 Series ICU Door System*
