THE STANLEY WORKS BUILDS WIRELESS CAPABILITIES

Las Vegas (ASIS Show) – September 25, 2007 – The Stanley Works, through one of its subsidiaries, today announced it has entered into a definitive agreement, subject to customary closing conditions, to purchase all outstanding stock of OSI Security Devices, a San Diego-based manufacturer and distributor of stand-alone electro-mechanical locks. OSI Security Devices has recently evolved to become a leader in wireless security. The parties expect to complete the transaction in the coming weeks.

“The OSI Security Devices acquisition will enable Stanley to provide a complementary offering to customers and OEM partners,” said Philip Bradney, Vice President, Business Development. “It will enable us to offer a full solution, from mechanical to online security.”

Dick Rasmussen, CEO, OSI Security Devices, said: “We’re very excited to join the Stanley team. The acquisition will give us access to markets and clients typically unavailable to a stand-alone organization.”

About OSI Security Devices

OSI Security Devices is a privately held corporation that was founded in 1986 in Sunnyvale, California. All members of the company’s Board of Directors hail from the high-tech defense electronic, software engineering, security industry, or legal fields of Silicon Valley.

Shortly after its founding, OSI Security Devices introduced one of the world’s first battery-operated stand-alone electro-mechanical locks, the OMNILOCK OM250. In 1997, OSI relocated to San Diego, and in 1999 the company embarked on an ambitious program to upgrade the product array. Incorporating feature-rich software and advanced magnetic card and proximity technologies, the OMNILOCK 2000-series systems offer the ability to enroll up to 2,000 users per

lock and the ability to manage facilities of over 65,000 users. In line with its technical backbone, OSI currently offers customers Internet-based technical or training support over the Internet via desktop streaming. This state-of-the-art service allows technical support personnel to come right to the desktop of customers nationwide and perform demonstrations or assist customers with their computer-based OSI software.

About The Stanley Works

The Stanley Works (NYSE: "SWK") is a worldwide supplier of consumer products, industrial tools and security solutions. Consumer products include hand tools, mechanics tools, tool storage, and hardware. Industrial tools include fastening systems, industrial mechanics tools and tool storage, auto assembly tools, storage systems, professional laser measuring and leveling tools and hydraulic attachments.
