Lockset Simplifies Retrofit, Facilitates ADA, OSHA Compliance

Best Access Systems of Indianapolis, a division of Stanley Security, expands its BEST 9K lock series with a new alternate throughbolt (ATB). Doors prepped for a cylindrical lock with a throughbolt spacing of 23/4 inches can now be retrofitted with the ATB option.

The 9K lock ATB option can also retrofit a variety of keying options. In combination with the SCHRC option, the ATB option can retrofit Schlage's door preparation and Schlage's large format removable core design. The ATB option is offered in 23/4-inch, 33/4-inch and 5-inch brackets, and is available with tactile functions for additional ADA and OSHA compliance.
