Stanley Security Solutions releases IntelligentVideo software

Stanley Security Solutions announces the release of pioneering real-time digital video content analysis software called Stanley IntelligentVideo. The software recognizes, analyzes and classifies information in live and captured video. In doing so, StanleyIntelligentVideo extends the capabilities of digital video recording and surveillance by providing intelligence, automation, efficiency and cost savings. The latest generation of digital video content analysis software, Stanley IntelligentVideo features new, advanced events and filters and interface enhancements.

For more information, call Stanley Security Solutions at 317-849-2250 or visit www.stanleysecuritysolutions.com.
