STANLEY SECURITY SOLUTIONS LAUNCHES NEW CENTER FOR LEARNING AND INNOVATION

***State-of-the-Art Facility to Set Industry Standards and Best Practices for
Product- and Skill-Based Training***

INDIANAPOLIS – September 22, 2008 – Stanley Security Solutions, Inc., an industry leader for providing integrated access control and security solutions, announced today the opening of the Stanley Security Solutions Center for Learning and Innovation. This new, multi-use learning facility will advance the Stanley® vision of becoming a global leader in commercial security by setting industry standards and best practices for product- and skill-based training.

Stanley Security Solutions is committed to providing learning services that offer maximum value for both external and internal customers. All learning programs go through extensive analysis designed to match the content with the appropriate delivery method and audience. The Stanley Security Solutions Learning team is staffed with instructors who have deep and broad industry experience and are schooled in developing and delivering content guided by adult learning principles and attention to the “voice of the customer.” The results are learning programs that effectively convey the maximum amount of content, in the least amount of time, in the most appropriate circumstances.

All learning programs at the Center offer “hands-on” experiences, simulating real-world situations, delivered in a safe and effective learning environment. Stanley Security Solutions is clearly investing in its future, and a major component of this investment strategy centers on this new state-of-the-art facility.

Located at 6161 East 75th Street, Indianapolis, Indiana, the new Stanley Security Solutions Center for Learning and Innovation is designed to provide customers and staff with more than world-class learning opportunities. In addition to classrooms configured for specific product training, the Center also includes conference and breakout rooms for customer focus groups, leadership and business skills training/development for Stanley Security Solutions staff, and to showcase and demonstrate Stanley Security Solutions products in an interactive, real-world environment.

“The systems integration environment of today requires a highly skilled, technical workforce more than ever,” said Brett Bontrager, president, Stanley Convergent Security Solutions. “The new Center for Learning and Innovation provides us better control over the development of such a workforce.”

Stanley Mechanical Access Solutions President Justin Boswell notes: “This new Center for Learning and Innovation is a significant investment in the future for both Stanley and our customers. Clients and employees who visit the new Center will experience an environment that’s designed to represent the full breadth and depth of Stanley Security Solutions and showcase our abilities to meet any security challenge.”

“Stanley has designed an outstanding training facility to match its outstanding factory training programs,” said Daryle Hutchens of the Fleet and Industrial Supply Center (FISC), Jacksonville, Fla. “I always find tremendous value in visiting Indianapolis for my training needs.”

“Stanley has put together a very impressive training facility,” said Ciree Loftus, independent training consultant. “You get the feeling that you are about to enter something special just walking up to the entrance.”

About Stanley Security Solutions

Stanley Security Solutions, a business division of The Stanley Works, is a provider of access control and integrated security solutions for institutional, commercial and industrial businesses and organizations.
