### **Stanley incorporates door closer**

The Stanley Door Closer by Ryobi has a wide range of functional adjustment capabilities, is built for year round use and eliminates the need for frequent maintenance. Its cylinder body is constructed of R14 die cast aluminum alloy, which provides wear resistance from contact with the piston during the opening and closing cycle.

Additional cylinder features include multiple regulating valves to provide a wide range of door control features, v-slotted valve regulation maximizes fine tune adjustment, and all weather hydraulic fluid eliminates the need for seasonal adjustment.
