Problem Solvers

SHREDDERS, SAFES AND VAULTS

Compiled by Brent Dirks, Associate Editor

Sargent and Greenleaf TouchVault

The TouchVault™ solution from Sargent and Greenleaf, a secure, self-service safe deposit access system, offers a biometric solution for safe deposit security. The system uses secure biometric fingerprint technology to authenticate customers and control day gate access. As a result, the solution eliminates the need for safe deposit keys, allowing unescorted box access. In addition, PIN access is used to offer two levels of authentication. *Sargent and Greenleaf.*
