Biometric Lock With PIN Offers Protection for Gun Safes and More

A new biometric-based lock for gun safes and other applications made by **Sargent and Greenleaf** of Nicholasville, Ky. — a **Stanley Security Solutions** company — has been announced. The product, which comes with a keypad, is suitable for security professionals who wish to serve the full scope of their client's security needs.

The lock features special algorithms that ensure a fast match between keypad PIN and fingerprint. An additional benefit is a backlit LCD that provides simple-to-follow instructions for users who may not be fully acquainted with the technology.
