Stanley Security Solutions Introduces Vantage Revolving Door System

Door can alternate from use as a security door, to automatic revolving, or even manual revolving

Stanley Security Solutions

Toronto, CAN – November 30, 2006 – Stanley Security Solutions, a provider of access control and integrated security solutions, introduced today a new evolutionary revolving door: the Vantage. This new revolving door, currently presented at the PM Expo/Construct Canada 2006 (Metro Toronto Convention Centre), adapts for use in a wide variety of applications to better answer industrial/commercial facility security needs, while optimizing the energy efficiency for these buildings.

"This door offers multiple functions for changing requirements throughout the day, week, month, etc," explains Jeff Fabian, sales director of CJRush Industries, a division of Stanley Security Solutions Canada. "All you need to do is choose the setting on the door for the required operation and it will conform to it, becoming a security door – one or two ways, an automatic door or a simple manual revolving door!"

"Recognized internationally as the pre-eminent Canadian Designer and manufacturer of custom architectural entrance systems, CJ Rush still maintains the highest standard of fabrication and finish that made its trusted reputation. "

"Today associated to Stanley Security Solutions Canada group, CJRush is working in synergy with Stanley Mechanical Access Solutions (Best locks, Precision exit devices, Stanley door closers and hinges), Stanley Access Technologies and Frisco Bay to offer comprehensive security systems allying reliability and excellence of service," concludes Fabian.

VANTAGE Revolving Door Technical Data

Features:

- Multi-functional control can be activated with either switches on the door, remote control, or from a remote location
- Concealed collapsing mechanism and speed control
- Door wings have emergency collapsing in either manual or automatic mode. In security mode, wings collapse only in case of fire if tied into the alarm.
- Doors are fully sensed for automatic door usage
- Bookfold wing position for emergency egress
- Conforms to ASTM E283 for air tightness
- Curved laminate glass wall enclosure (tempered option)

- Tempered glass door wings
- Factory assembled for fit and function prior to shipment
- Concealed fasteners
- One year warranty

Security Function:

- Anti-piggybacking (optional)
- Anti-tailgating
- Two way simultaneous traffic
- All type reader access capability
- Emergency fail safe feature
- Door wings collapse in case of emergency alarm
- Overhead sensing system
- Door can be set up from a remote location
- One way security, Free flow the other direction

Sizes:

- Three or Four wing configurations
- 8 ft. to 10 ft. diameters as required

VANTAGE Revolving Door Technical Data
