STANLEY HARDWARE INTRODUCES NEW LINE OF SECURITY 24/7 PROFESSIONAL GRADE PADLOCKS

High-End Locks Ideal for Professional Trade and Commercial Users, Providing Premium Protection, Durability for Applications Requiring Higher Security

INDIANAPOLIS – September 27, 2008 – Stanley® Hardware, a division of Stanley Security Solutions, a provider of integrated access control and security solutions, today announced the release of Stanley Security 24/7™ Professional Grade Padlocks, offering professional tradesmen a variety of unique security features and innovative design to tackle the toughest jobs and conditions head-on.

Unlike other padlocks in its class, the Security 24/7 Professional Grade Padlocks are tested to meet the complete suite of American Standard Testing Measure (ASTM) standards, with ASTM security grade ranges from 3 to 6. The Security 24/7™ line features precision locking mechanisms, a wide range of extra security features and the highest quality materials to provide the professional with outstanding protection and peace of mind.

"With the Security 24/7 lineup the professional tradesman can realize the ultimate in padlock security, performance and durability," said Joshua Jacobs, marketing director, Stanley Hardware. "The Stanley Security 24/7 Professional Grade padlocks are engineered to meet the rugged demands of any job site or project."

The Hardened Steel Security Lock and All-Weather Solid Brass Security Lock offer premium security for any project or application. Duplex nickel cams prevent freeze-ups in inclement weather, and full-size, commercial six-pin cylinders with anti-pick pins provide outstanding protection against picking. Hardened steel and nickel silver bottom pins and solid brass top pins extend the life of the locks. The All-Weather Solid Brass Security Lock features a solid brass body that protects it from corrosion under virtually all conditions, yet still has all the maximum security features any application demands.

The Laminated Security Lock features heavy-duty laminated steel for strong protection on the job site. Recessed rivets prevent taking the lock apart with cutting tools and the hardened molybdenum alloy steel shackle resists cutting attacks. Hardened steel and nickel silver bottom pins and solid brass top pins prevent key wear-down, extending the lock's lifecycle.

The Combination Security Lock offers all the features of a high-security lock, coupled with the convenience of a combination lock. Solid brass internal components and hardened steel locking pins prevent internal corrosion.

Stanley Security 24/7™ Professional Grade locks can be found at hardware retailers, including Tractor Supply Company outlets and select Lowe's stores.

Product Features and Benefits

Hardened Steel Security Lock

- Solid hardened steel protects lock from attacks
- Hardened molybdenum alloy steel shackle resists sawing and cutting attacks
- Dual stainless steel ball-bearing locking system resists pry attacks
- Commercial 6-pin cylinder with pick-resistant pins is more secure than 5-pin mechanisms
- Removable cylinder to key alike or re-key
- Rotating keyway cover protects against drilling attacks
- Shrouded body provides even greater resistance to pry attacks
- ASTM security rating 4 (50mm) and 5 (60mm)

All-Weather Solid Brass Security Locks

- Solid brass body is corrosion-resistant under virtually all conditions
- Molded rubber cover protects keyway from the elements
- Stainless steel shackle resists sawing and cutting attacks
- Dual stainless steel ball-bearing locking systems resists pry attacks
- Commercial 6-pin cylinder with anti-pick pins is more secure than 5-pin mechanisms
- Removable cylinder to key alike or re-key
- Rotating keyway cover protects against drilling attacks
- ASTM security rating 4 (50mm)

Laminated Security Lock

- Laminated steel body, hardened steel end caps and recessed rivets protect lock from attacks
- Hardened molybdenum alloy steel shackle resists sawing and cutting attacks
- Dual stainless steel ball-bearing locking system resists pry attacks
- Commercial 6-pin cylinder with anti-pick pins is more secure than 5-pin mechanisms
- Removable cylinder to key alike or re-key
- Rotating keyway cover protects against drilling attacks

- Available with shrouded body, providing even greater resistance to pry attacks
- ASTM security rating 5 (60mm) and 4 (50mm)

Combination Security Lock

- Hardened molybdenum alloy steel shackle resists sawing and cutting attacks
- Dual hardened steel locking bolt system resists pry attacks
- No keys required – user sets own combination
- Snap-fit cover seals lock away from the elements
- ASTM security rating 3 (50mm)

About Stanley Hardware

Founded in 1843 in New Britain, Connecticut, the Stanley Works' early credits include the first hinge hasp, the first crate hinge, the first hinge with reinforced joint, the first 'blind' hinge, and in 1899, the first patent for a ball bearing hinge. Today, Stanley Hardware is a global organization supplying hardware and tools for the architectural, consumer, industrial and residential markets worldwide. Utilizing state-of-the-art research, manufacturing and quality-control capabilities that incorporate the latest techniques, procedures and equipment, Stanley continues to deliver the innovative, high quality products that have made the Stanley name synonymous with the highest craftsmanship and dependability for more than 150 years.

About Stanley Security Solutions

Stanley Security Solutions, a business division of The Stanley Works, is a provider of integrated access control and security solutions for institutional, commercial and industrial businesses and organizations. With a strong emphasis on service, Stanley Security Solutions delivers a comprehensive suite of security products, software and integrated systems directly to end user customers. Stanley Security Solutions is committed to extending its position as a leading comprehensive resource for a broad and extensive array of solutions that span the entire security spectrum.
