**STANLEY SECURITY SOLUTIONS  
AWARDED STRATEGICALLY SIGNIFICANT CONTRACT BY NASA**

***Comprehensive, Integrated Access Control and Security System to be Installed in  
Phases Throughout Space Agency's Multiple Sites and Locations***

**Indianapolis, IN., – July 22, 2005** – Stanley Security Solutions, Inc., a provider of access control and security solutions, today announced it has been awarded a strategically significant contract by the National Aeronautics & Space Administration (NASA). As part of the two-year contract, Stanley Security Solutions will provide a suite of access control and security systems throughout the space agency's various facilities within the United States. The \$4.8 million contract award is classified as indefinite delivery, indefinite quantity (IDIQ) and contains an option to extend the agreement beyond the initial two-year period, which would increase the value and scope of the project for Stanley Security Solutions.

The installation, which is a component of NASA's Common Badging and Access Control Systems (CBACS) initiative, is an extension of an earlier smart card project Stanley Security Solutions began developing with NASA. The agreement calls for Stanley Security Solutions to develop and install an external and internal building entry and smart card-based access control and security system. The security system will be comprised of a wide array of Stanley Security access control technologies, products and integrated solutions.

The installation will initially encompass five sites with subsequent sites expected to follow over the course of the contract. Sites for the initial installations include: Langley Research Center in Hampton, VA., The Jet Propulsion Laboratory in Pasadena, CA; Glenn Research Center in Cleveland, OH; Goddard Space Flight Center in Greenbelt, MD and Ames Research Center in Moffett Field, CA.

“As we have been working with NASA for a number of years, this contract win represents the hard work, dedication and determination of the Stanley Security Solutions NASA Team,” said Joe Costa, vice president of sales for Stanley Security Solutions. “The government security space is an extremely important target for Stanley Security Solutions. The NASA deal affords us the opportunity to take the knowledge and credentials from this project and use them to open the doors to all the other government departments and agencies. We fully anticipate this will be the first of many such government related contract announcements we will make in the very near future.”

### **About Stanley Security Solutions**

Stanley Security Solutions, a business division of The Stanley Works, is a provider of access and security solutions for institutional, commercial and industrial businesses and organizations. With a strong emphasis on service, Stanley Security Solutions delivers a comprehensive suite of security products, software and integrated systems directly to end user customers. Stanley Security Solutions is committed to extending its position as a leading comprehensive resource for a broad and extensive array of solutions that span the entire security spectrum.
