

Product Discontinuation Notice

Best SL6000 Series Closers

Thank you for choosing BEST for secure, reliable, and innovative security solutions.

As part of our ongoing commitment to maintaining a focused, future-ready product portfolio, we would like to inform you that the BEST SL6000 closer series will be discontinued effective **June 30, 2026**.

After this date, these products will no longer be available for new orders. Service and replacement parts will continue to be available in accordance with our standard product support policies.

To support a seamless transition, we recommend the dormakaba 7400 closer series as a replacement. The 7400 delivers the same dependable performance and functionality as the SL6000 series while offering added flexibility through its adjustable spring size, helping simplify product selection and inventory management.

Additionally, the following closer arm types will be discontinued across all dormakaba and BEST closer series effective **June 30, 2026**:

Arm Type			
Platform	AFJ	Friction HO	FHJ
Round	ARJ ARNPJ	Track	JTH FTH
Cushion IS	ISH ISJ ISJH	TDE Track	TDEHR TDEHL
Spring stop	SISH SISJ SISJH		

To support a smooth transition, our team will be happy to recommend suitable alternative products from our current lineup and assist with any technical or commercial questions.

We appreciate your understanding and continued partnership.

Sincerely

Thorsten Huemmeler
Sr. Product Manager, Door Closers and Low Energy Operators
