

## Arm-A-Dor® Series by BEST

# The ultimate safety and security solution for exit doors.

Keep occupants and inventory safe with the Arm-A-Dor maximum security exit-only device. With enhanced durability features, a built-in alarm, and easy-to-operate design, Arm-A-Dor delivers maximum protection against forced entry, internal theft, and emergencies. Even in the most demanding applications, trust Arm-A-Dor for secured door applications.

## Take control in the fight against back door break-ins.

With so much depending on the security of a building's rear exit, business owners simply cannot afford to install a standard exit device, alarm or deadbolt to the rear entry door. This durable, pre-assembled, all-in-one exit device protects a facility's most important assets, while maximizing life safety at the same time.

- **Enhanced security.** Four-point thru-bolt mounting offers greater security and protection against forced entry.
- **Rugged design.** Two-point solid steel deadbolt latching provides a locking bar that extends onto the door frame rather than a traditional latch and strike, offering greater protection against intrusion and withstanding greater use and abuse.
- **Easy installation.** Pre-assembled for 3'-4' doors, designed non-handed, and mounted to the door via four thru-bolts, Arm-A-Dor is simple to install and retrofit.

Installed by many of the nation's largest retailers, the Arm-A-Dor Series has earned a reputation for strength in every situation—performing in even the most abusive applications.

Maximize safety and security on exit doors with the BEST Arm-A-Dor®.

## Comprehensive protection for exit doors.

Integrating features that maximize durability with a rugged design and built-in security, Arm-A-Dor delivers a complete exit security and safety solution.
